AGM 6/400

Product code: 61004000

In AGM batteries, the electrolyte (mixture of water and sulphuric acid) is largely absorbed in glass fibre. This type of battery is entirely maintenance-free and there is no gas formation with normal use. AGM batteries can be installed anywhere.

Their construction gives a very fast discharge at very high currents so AGM batteries are ideal for systems that require high currents (for instance when starting an engine). The battery poles can be unscrewed and this type of battery can be combined with every standard battery terminal.

- · Offers an alternative solution in placement and dimensioning.
- Easy configuration of 12/24/48 V battery banks, with high capacity.
- · Double pole for easy installation.
- · No gas formation with normal use.
- · Can be combined with every standard battery terminal.
- · Two year warranty.

Specifications

General specifications

Nominal battery voltage 6 V Nominal battery capacity C20 400 Ah

110 A Max. charge current

Terminals A-type + stud M10 Max. outer dimensions (incl. terminals/grip handles), lxwxh 295 x 180 x 428 mm 11.6 x 7.1 x 16.9 inch

Weight 53 kg 116.8 lb

Technical specifications

CCA to DIN 620 A CCA to SAE 1100 A
